

JOEFFREY DE LA CRUZ

PROFESSIONAL SUMMARY

Confident individual with strong problem solving, communication and learning skills. Brings reliability, initiative and a positive approach to new tasks and challenges. Eager to contribute to team success, build capability and develop further in a professional environment.

EXPERIENCE

Web-Based Application Development

Developed scalable web applications using Laravel, PHP, and MySQL, with a focus on secure data handling, user authentication, structured workflows, and administrative dashboards to improve data management and system efficiency.

Desktop Application Development

Designed and developed desktop applications aimed at usability, system efficiency, and workflow automation, integrating local data processing and intuitive interfaces for offline and hybrid operations while gaining experience in software architecture, debugging, and deployment.

Capstone Project | E-Guidance Platform

Developed an E-Guidance system that digitized traditional guidance office processes by reducing paper-based transactions, centralizing student records, counseling requests, and administrative coordination, and improving workflow efficiency and structured data management.

On-the-Job Training (OJT) Experience – IT Support & Networking

Provided technical support in enterprise environments by troubleshooting hardware and software issues, performing system maintenance, and gaining hands-on experience in computer networking, basic network security, and infrastructure troubleshooting to ensure system reliability and continuity.

EDUCATION

Bachelor of Science, Information Technology

06/2022 to 06/2026

Misamis University - Ozamiz City

AWARDS, ACCOMPLISHMENTS, AND HONOURS
